

## Twitter

Lucas Heilman, Kathryn Mechura, and Syver Johansen

11/21/16

### Project Plan :

Pull all tweets made by the White House or POTUS or Barack Obama accounts during the past 8 years and analyze them to find the most important topics to the current president. This can be expanded to the presidential candidates during their campaigning. It could also be expanded to pull from other social media platforms like Instagram.

### Goals:

1. Short term:
  - a. Figure out a way to grab the tweets from twitter
  - b. Evaluate the data we pulled and organize it in a way for WMR to understand
  - c. Look through the most common words/phrases and see how these represent their rhetoric/important issues
  - d. Figure out how to clearly represent our findings
2. Long term:
  - a. Expand it to the other candidates
  - b. Expand it to other social media
